Problem:

To build a ecommerce App From which a user can buy and sell things

Abstract:

In this Project we will build a ecommerce App. From this app User will be able to sell its products online. This app basically consist on two panel (Admin panel and Customer panel).If a user wants to see his things he will make a account as Admin and if the Person wants to Sell the Items then he would make the account as the User.

Group Discussion

We did our group meeting via MS Teams

Solution:

So we divided this project in 3 Modules

First Module:

Firebase Authentication , Storing Data and Uploading Files To the Firebase Storage

Second Module:

Developing the Adding and Displaying of Products, Developing Product Details Screen And Developing Cart ,Cart Overview and Details

Third Module

Adding The Checkout Activity ,Allowing The User To Add Addresses And Building the Order Screen
